

Description

This document specifies the carbon footprint of Dunlop Hiflex Oy, expressed as tons of CO2e.

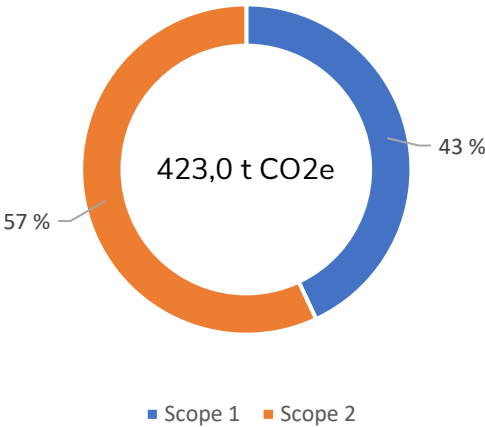

Parameters

Company:	Dunlop Hiflex Oy
Period:	01.01.2023 – 31.12.2023
Calculation:	26.3.2024, Reforest Finland Oy
Total carbon footprint:	423,0 t CO2e

Methodology

Organization carbon footprint calculation covers greenhouse gas emissions from the operations of the organization. The unit for measuring carbon footprint is carbon dioxide equivalent., which encompasses the global warming effect of various greenhouse gases. The method is based on the GHG Protocol guidance. The calculation includes the direct and indirect Scope 1 and Scope 2 emissions.

Carbon footprint

Resurssi	Tons of CO2e	%
Company vans	17,6	4,1 %
Company cars	163,4	39 %
Gases	1,2	0,3 %
Electricity	195,4	46 %
Heating	45,5	11 %
<b>Total</b>	<b>423,0</b>	<b>100 %</b>

Info

The purpose of this document is to provide Dunlop Hiflex Oy's customers with an accurate representation of the greenhouse gas emissions associated with the organization's emissions. This document is delivered upon request and should not be forwarded without permission from Dunlop Hiflex Oy. The organization has calculated its carbon footprint in collaboration with Reforest Finland Oy. Reforest Finland Oy is confident that, at the time of review, the calculation accurately represented the carbon footprint in accordance with the previously described methodology. In defining emission factors, primary data from Dunlop Hiflex Oy, as well as from the Ecoinvent and Base Carbone databases, and field research have been utilized.
