

NORDIC INTERCHANGE SLK - SLK PE SERIES

// SLK - SLK PE

SAFETY LOCK - POPPET CONNECTION STYLE

DN 6 to 25

to max WP 450 bar

- // Fully interchangeability with other Nordic Series products
- // Connection under residual pressure (PE version)
- // Extra-safe construction thanks to safety lock
- // Configuration includes BSP female internal threads (others threads on request)
- // High resistance and durability under tough application
- // Available with protective caps

General features: the ARGUS SLK and SLK PE Nordic Series comprises a comprehensive range of hydraulic quick-release couplings specifically designed for the most demanding applications and heavy-duty equipment. This series distinguishes itself as a premier choice, excelling in both specifications and performance, providing a tough, durable product of superior quality. Constructed from Zi Ni treated carbon steel, the series is particularly well-suited for use in environments with severe climates, such as those found in the Nordic countries. This ensures maximum corrosion resistance and durability.

The series features a poppet valve mechanism that allows couplings to be connected under static pressure by hand. A safety sleeve guarantees fast and secure connections, preventing any accidental uncoupling. Additionally, enhanced sealing capability is ensured by an additional O-Ring and Back-up Ring. The SLK Pressure Eliminator (PE) facilitates connections in the presence of residual pressure.

Materials: carbon steel - Zi Ni - NBR sealing parts (other material available on request)

Temperature range: -30 °C +125 °C

Note: specific instructions for installation, use and maintenance are separately provided.
